Mission Statement
OhioLINK Collection Building Task Force
July 2004

The role of the Collection Building Task Force (CBTF) is to support the goals of CIRM as stated in the Statement of assumptions & Objectives for Cooperative Collection Development (http://www.ohiolink.edu/ostaff/policyhbk/cirm/1.assumption.html). The Task Force is charged by CIRM to expand the amount spent on cooperative purchases through identifying specific information resources of value to the OhioLINK community and encouraging the reduction of duplication in current purchases, thereby freeing funds to be reallocated to increase the depth and breadth of the collection; to investigate and foster specific methods to achieve the former; and to foster increased involvement in and coordination of local collection development activities with those of other OhioLINK member libraries.
